

*The Delta Science Program, the CDFW Watershed Restoration Grants Branch,
and the Surface Water Ambient Monitoring Program Jointly Present a Brown Bag Seminar Series*

The Delta as Changing Landscapes

One of a series previewing the upcoming *State of Bay-Delta Science 2016*

Tuesday, October 25th

Noon to 1:00

Park Tower Plaza

2nd Floor Conference Room

980 Ninth St., Sacramento, CA

featuring

Letitia Grenier, Ph.D.

Resilient Landscapes Program Director
San Francisco Estuary Institute

Landscape Science: Contributing to the Collective Vision of a Future Delta

Dr. Grenier will discuss the transformation of the Delta, focusing on those aspects that support healthy ecologies. Studying change informs us on how to more effectively restore landscapes and ecological functions. She will draw from her recent report *The Delta as Changing Landscapes*, included in *The State of Bay-Delta Science (SBDS) 2016*, and from the Delta Landscapes project (SFEI), which examines how Delta ecosystems functioned from the 1800s to present day – and how they might function in a renewed Delta of the future.

The *State of Bay-Delta Science (SBDS) 2016* is a collection of papers that summarizes the scientific understanding of the Sacramento-San Joaquin Delta. It will include a report by Dr. Letitia Grenier (along with Dr. John Wiens, Robin Grossinger, and Dr. Michael Healy) on Delta Landscapes. The report will be available via the [San Francisco Estuary & Watershed Science Journal](#). For more information, [please click here](#).
